

Machine Vision Camera

BB6K005

Part Number

- Compact and robust aluminum housing in 29 × 49.1 × 29 mm format
- Different lenses can be adapted thanks to standard thread
- High-resolution 4000 x 3000-pixel image chip

Machine Vision Cameras make it possible to record images in vision applications. The images are read out via a 1-gigabit Ethernet interface. The camera can be connected via a PoE port so that only one cable is required. The small and rugged aluminum housing as well as the C-mount threaded connection can be easily and flexibly integrated. The high-performance Sony Starvis image chip ensures high resolution and optimum image quality without noise even in difficult lighting conditions.
